Graduated with Diploma in Informatics Engineering majoring in web development from Amikom University Yogyakarta with a Cumulative GPA of 3.89/4. Have passion and interest in Frontend Developer. In the same field, I have approximately 1 year of internship experience at GCM Foundation and PT. Media Kreasi Abadi as Frontend Developer. Able to use React JS, Typescript, Bootstrap, Tailwind, Sass, and Git.

## EXPERIENCE

**FEB 2022 – JUL 2022**

### **FRONTEND DEVELOPER - INTERNSHIP, PT MEDIA KREASI ABADI**

- Responsible for brainstorming, developing, testing, collaborating, code reviewing, deploying, bug bashing, and launching frontend feature in a team. (React, Typescript, CSS, Context API).
- Ensure the technical feasibility of UI/UX design.
- Lead and assign tasks to the team so that the work can be completed according to the target time. (Microsoft Planner)
- Integrate the API that has been created by the backend division so that the website can be used functionally. (Axios)
- Pitching to stakeholders and mentors.

**JAN 2022 – JUL 2022**

### **BACKEND DEVELOPER – PART TIME, GCM FOUNDATION**

- Develop an online exam website with various types of questions and answers. (Laravel)
- Ensure the technical feasibility of UI/UX design and define tasks to delegate to other engineers.
- Designing the API as needed to be consumed on the frontend.
- Integrate the API on the frontend to make it work as intended. (React, Axios)

**SEP 2021 – JAN 2022**

### **FRONTEND DEVELOPER – INTERNSHIP, GCM FOUNDATION**

- Design the login page according to the briefing by the company CEO. (Figma).
- Developing authentication systems on various blended learning websites under the auspices of Geschool. (React, Bootstrap)

**AUG 2018 – AUG 2019**

### **FIBER OPTIC TECHNICAL SUPPORT – FULL TIME, PT. JEMBATAN CITRA NUSANTARA**

- Conduct a site survey of prospective clients to ensure that prospective clients are within the coverage of the company's fiber optic network and provide details of the requirements needed for installation to make it easier for sales to calculate the required costs.
- Provide an overview to the installer regarding the location of potential clients to facilitate the installation process.

- Successful installation of internet network over 50 new clients.
- Maintain service quality by performing network maintenance to maintain client comfort and satisfaction.
